

Configuration variants of room operating units

Room temperature sensors and measuring transducers,
on-wall, device series Baldur

Housing temperature sensors are electric contact thermometers for measuring temperatures in the gases (air) surrounding them on all sides. Room temperature sensors / measuring transducers are used for measuring air temperature (in non-precipitating air), for changing setpoint values, for presence detection, or as operating panels with push-buttons, switches, potentiometers, status indicators (LEDs) in residential, working, office and business facilities as well as in the industrial sector.

Here are some design and configuration examples of variants of the new Baldur series devices that can be individually customized ...

DEVICE SERIES

Baldur 1 (85 x 85 x 27 mm)

Baldur 2 (98 x 98 x 33 mm)

Baldur lying

Baldur 1
without operating elements

Baldur 1
with display

Baldur 1
with display and potentiometer

Baldur 1 with potentiometer,
push-button, and LED

Baldur 1 with potentiometer
and rocker switch

Baldur 1 with potentiometer
and push-buttons

Baldur 1 with potentiometer
and LEDs

Baldur 1 with potentiometer
and LEDs

Baldur 1 with potentiometer
and LEDs
