

GSM/UMTS/LTE Antennas for REX 100/200/250

Magnetic base antenna, GSM/UMTS/LTE, 2dBi, incl. 3 m cable, SMA male connector

- Gain 2 dBi
- 3 m Cable length
- SMA male connector

For radio reception, a suitable antenna must at least be screwed onto the SMA socket "MAIN" (ANT 2). In order to improve the 4G data throughput, a second antenna terminal is available on the REX 100 LTE router with the SMA socket "Rx" (ANT1). If you would only like to install one antenna, we recommend the MiMo wall antenna, as it already contains two antennas in one housing. Our technical sales is happy to answer any questions you may have regarding the various antennas.

Technical specifications

General information

Order number

700-751-ANT33

Article name

Magnetic base antenna, 2dBi, 3 m cable, SMA male connector

Scope of delivery

Magnetic base antenna, incl. cable

Transport and storage temperature

-40 °C ... +85 °C

Radio networks

LTE 800 | GSM 900 | GSM 1800, UMTS, LTE 2600

Frequency range

699–960 MHz | 1710–2690 MHz

Polarization

vertical

Gain

2.2 dBi

VSWR
