Memory modules of Saia® PCD3.Mxxxx controllers

In addition to the onboard memory contained within the base units, PCD3 controllers can also be expanded in a modular way with various flash memory modules for programs and data. The various communication protocols whose firmware is installed on the flashcards can also be used by simply inserting the relevant card.

More information to memory management and construction can be found in the section 1.1 Saia® PCD System description.

System properties

- Configuration, programs and data can be transferred from one CPU to another
- Two slots (M1 and M2) for memory cards
- Additional memory cards can be inserted in the I/O slots using I/O adapters
- Memory can be expanded to 4 GByte
